

INSTALLATION GUIDE

Diode Dynamics SS2 Fog Light Mount for 2023+ Toyota Corolla GR

What is included
with your kit

Fully Assembled. The locking nuts on the back are sealed in with Gorilla Tape to protect them and also make installation much easier.

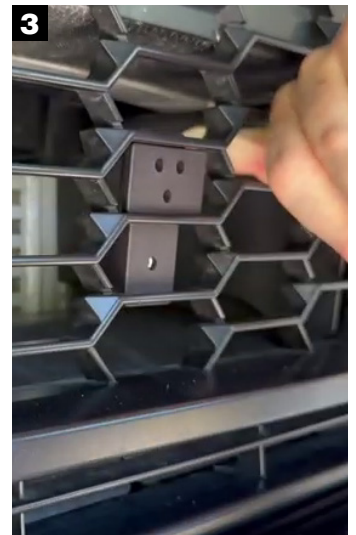

A special thank you to Jim with JimsGarageToys (<https://www.youtube.com/@jimsgaragetoy>) for helping to develop this product and also for the installation video [HERE](#)

1 Install the mount with the top 4 columns over and 3 rows up.

2 The back part of the mount should fit through the grille opening (2). Use your finger to press it in place (3).

Use your supplied hex tool (4mm) to secure the front part of the mount to the back. 4 Screws in total.

Mount your SS2 light with the included 45mm socket cap hex screw, washers, and acorn nut. Use the supplied hex key and flat wrench. Include outside washers in **PINK**. The inside washers are included to fill gap once the fog light is mounted on the screw. One washer should work, but a second is included just in case.

Wire up your lights and you're ready to go!
